# E-Waste Registration & Recycling Target Calculator

Mini-Task Deliverable — Computer Engineering, Third Year

Name: Kavish Khan
Roll No: 24102C0036

## Sample Output — Financial Year 2025–26

| Company | Type | Waste Gen. (MT) | EPR Target (MT) | Reg. Fee (Rs.) | Recycled (MT) | Status |
|---|---|---|---|---|---|---|
| Dixon Technologies | Manufacturer | 120 | 84.0 | 7,500 | 80 | Non-Compliant |
| Foxconn India | Producer | 4200 | 2940.0 | 10,00,000 | 3200 | Compliant |
| Tata Electronics | Manufacturer | 850 | 595.0 | 1,50,000 | 700 | Compliant |
| VVDN Technologies | Producer | 45 | 31.5 | 2,500 | 30 | Non-Compliant |
| Syrma SGS | Recycler | 6000 | 4200.0 | 10,00,000 | 5500 | Compliant |

Note: Waste-generated, actual-recycled figures, and entity types are illustrative sample inputs (as permitted by the task) used to demonstrate the calculation logic; the target %, fee slabs, and formulas applied are per the rules below.

## Raw Console Output

```
E-Waste Registration & Recycling Target Calculator
1. Run demo with 5 sample companies
2. Register a new company (manual input)
Choose an option (1/2): Financial Year for report [default 2025-26]: ========================================
E-WASTE EPR COMPLIANCE REPORT — FY 2025-26
============================================================
Name              : Dixon Technologies
Entity Type       : Manufacturer
Financial Year    : 2025-26
Annual E-Waste    : 120 MT
EPR Target        : 84.0 MT (70% of generated waste)
Registration Fee  : Rs. 7,500
Actual Recycled   : 80 MT
Compliance Status : Non-Compliant
------------------------------------------------------------
Name              : Foxconn India
Entity Type       : Producer
Financial Year    : 2025-26
Annual E-Waste    : 4200 MT
EPR Target        : 2940.0 MT (70% of generated waste)
Registration Fee  : Rs. 1,000,000
Actual Recycled   : 3200 MT
Compliance Status : Compliant
------------------------------------------------------------
Name              : Tata Electronics
Entity Type       : Manufacturer
Financial Year    : 2025-26
Annual E-Waste    : 850 MT
EPR Target        : 595.0 MT (70% of generated waste)
Registration Fee  : Rs. 150,000
Actual Recycled   : 700 MT
Compliance Status : Compliant
------------------------------------------------------------
Name              : VVDN Technologies
Entity Type       : Producer
Financial Year    : 2025-26
Annual E-Waste    : 45 MT
EPR Target        : 31.5 MT (70% of generated waste)
```

```
Registration Fee  : Rs. 2,500
Actual Recycled   : 30 MT
Compliance Status : Non-Compliant
------------------------------------------------------------
Name              : Syrma SGS
Entity Type       : Recycler
Financial Year    : 2025-26
Annual E-Waste    : 6000 MT
EPR Target        : 4200.0 MT (70% of generated waste)
Registration Fee  : Rs. 1,000,000
Actual Recycled   : 5500 MT
Compliance Status : Compliant
------------------------------------------------------------
```

## Explanation of Rules Used

The EPR recycling target (Step 2) is calculated as Annual E-Waste Generated × Target %, where the Target % is fixed by financial year as 60% for FY 2023–24/2024–25, 70% for FY 2025–26/2026–27, and 80% from FY 2027–28 onward, in line with the rising EPR recycling-target schedule under the E-Waste (Management) Rules, 2022. The registration fee (Step 3) is then looked up from the CPCB slab structure, which bands the computed target (in MT) into five ranges — below 50, 50–100, 100–1000, 1000–5000, and above 5000 — each carrying a fixed fee from Rs. 2,500 up to Rs. 15,00,000. Compliance status (Step 4) is determined by comparing the actual e-waste recycled against this computed target: a company is marked "Compliant" only if actual recycled quantity meets or exceeds its EPR target for the year, otherwise "Non-Compliant", reflecting how CPCB evaluates producer performance under the annual EPR return filing process.
