State E-Waste Management Tracker

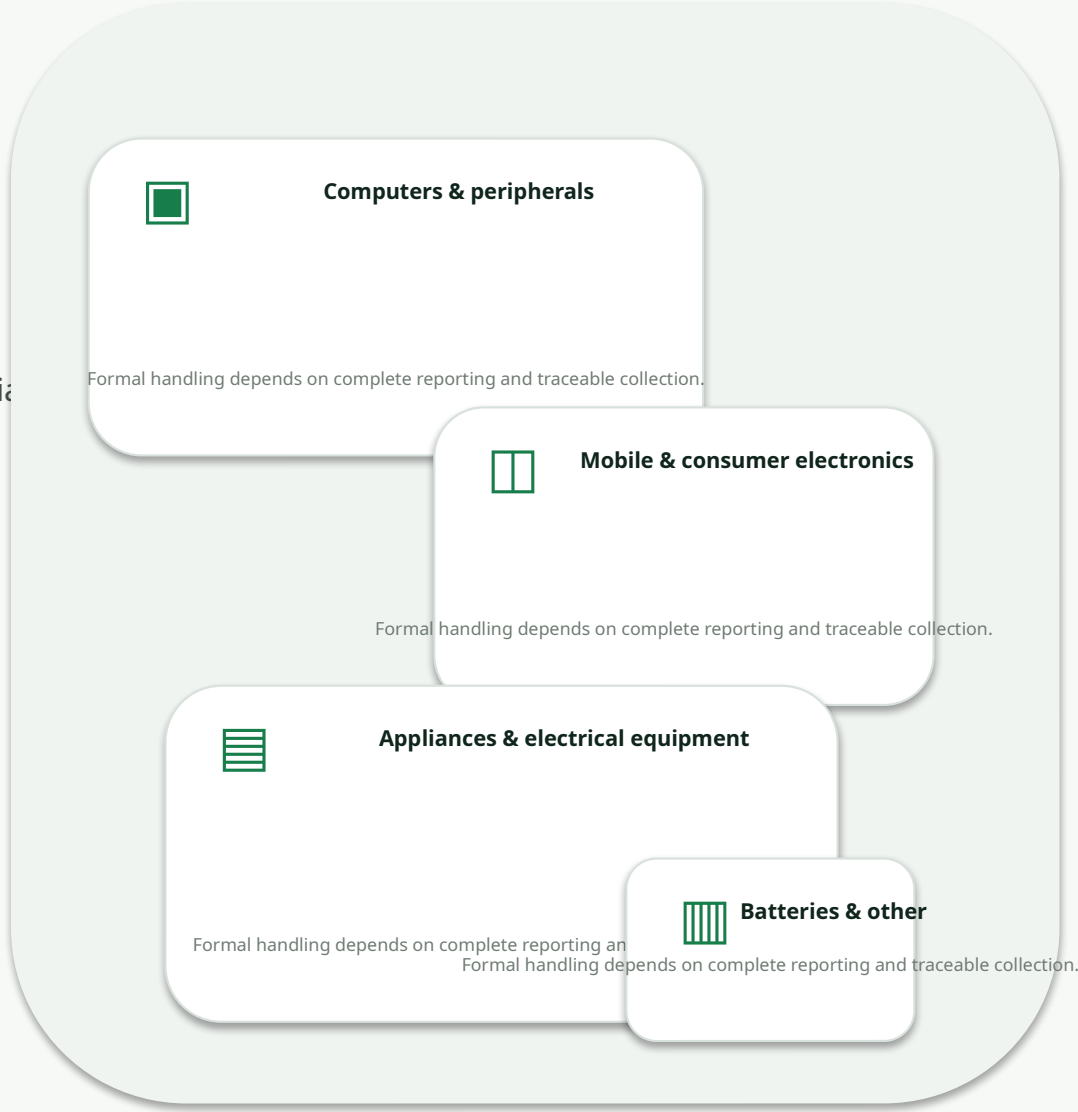

Kasim Ghanchi · 24102C0015 | Ali Mehdi Mirza · 24102C0054

-waste management position — scorecard performance, formal recycling capacity, compli

Tracker snapshot

15 districts · 60.49M population · 388,000 t/yr listed capacity

Live workbook score → **20.5 / 100** **Critical**

Source: State_EWaste_Tracker_Final(1).xlsx · current populated workbook values

Uttar Pradesh is currently rated Critical

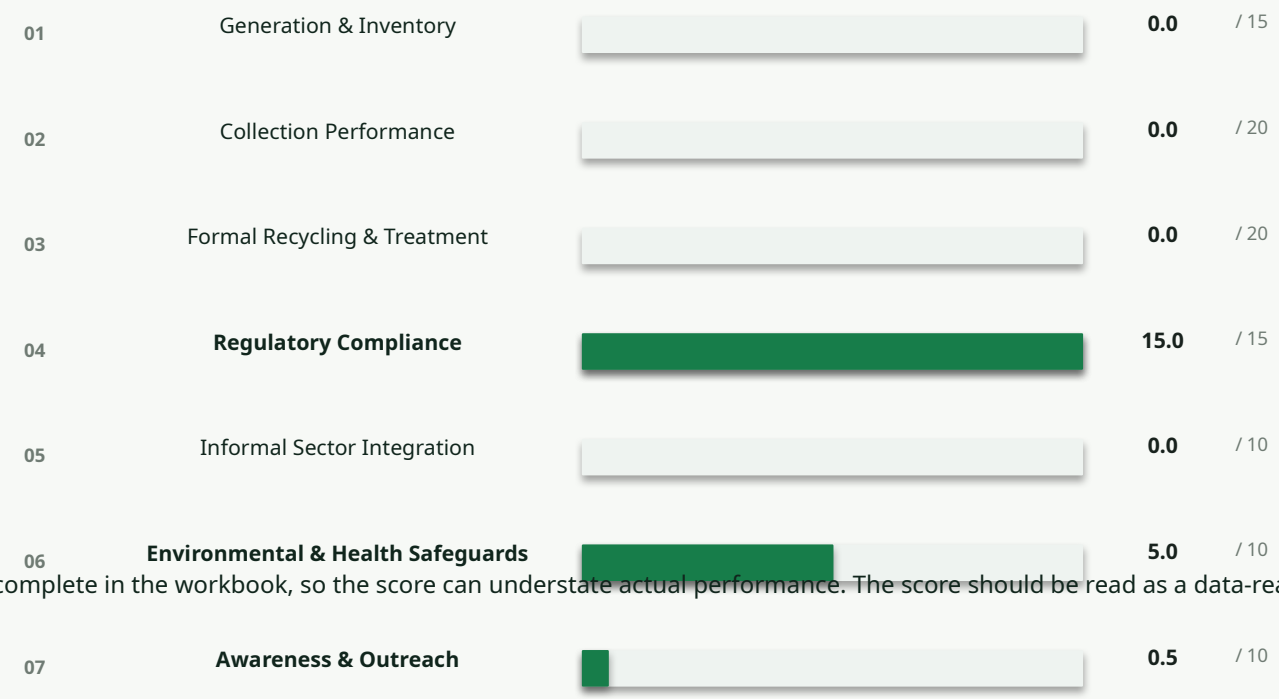

The workbook's live score is 20.5 / 100. The result reflects populated fields and benchmark logic — not an external audit.

STATE SCORE

20.5 / 100

CRITICAL

45+ is the next band threshold

PRIMARY SIGNAL

20.5

points are currently earned

Key caution

Generation, collection and informal-sector numeric fields are incomplete in the workbook, so the score can understate actual performance. The score should be read as a data-readiness signal as much as an outcome s

Source: 0_Scorecard + 1_Generation_Inventory + 2_Collection_Log + 5_Informal_Sector_Hotspots

The tracker covers a broad state footprint, but reporting is uneven

District, recycling, hotspot, environmental and awareness data are present at different levels of completeness.

15	60.49M	5	4	2
District rows in inventory	**Population covered**	**Named recycler rows**	**Informal hotspots**	**Monitored sites**
State total population is 60.49M	Population field in tracker	125 authorized units stated in total row	0 formalized / remediated in totals	Environmental monitoring

What is actually populated

Generation	District names + population; category quantities mostly blank
Collection	State collected total populated; district-level collection fields blank
Formal recycling	388,000 t/yr capacity; 376,896.74 t processed
Compliance	One aggregate EPR row marked compliant; inspections recorded
Informal sector	4 hotspots listed; worker counts not populated
Environment	2 distinct sites monitored; 0 health camps
Awareness	1 program recorded; 0 participants

DATA READINESS

High

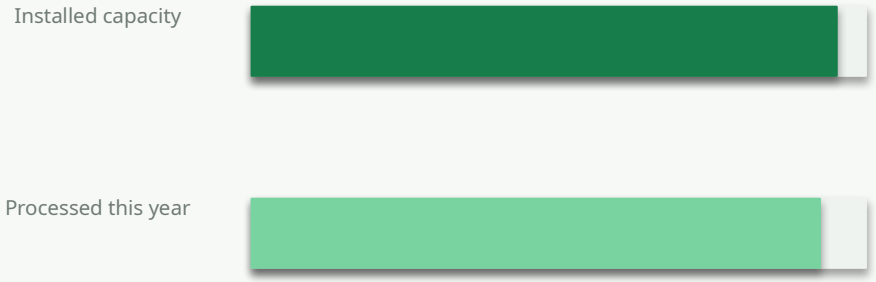

coverage, low field completeness

Source: All 7 numbered data sheets; values shown as stored in workbook

Formal recycling infrastructure is the strongest operational dataset

Five recycler / dismantler rows are named, with 388,000 tonnes/year installed capacity and 376,896.74 tonnes processed this year.

Installed capacity vs processed

97.1% of listed capacity is represented as processed

Named facilities

1. **Attero Recycling Pvt. Ltd.**
   Gautam Buddha Nagar · 120,000 t/yr · 96,000 t processed
2. **Greenex Eco Recycling Pvt. Ltd.**
   Ghaziabad · 24,000 t/yr · 18,500 t processed
3. **Horizon Recycling Pvt. Ltd.**
   Moradabad · 18,000 t/yr · 14,200 t processed
4. **Sims Recycling Solutions India**
   Gautam Buddha Nagar · 35,000 t/yr · 28,000 t processed
5. **Bharat Oil & Waste Management Ltd.**
   Kanpur Nagar · 15,000 t/yr · 11,000 t processed

Workbook total row: 125 authorized units · 388,000 t/yr capacity · 376,896.74 t processed

nce is fully credited in the current scorecard, while safeguards show partial c

The workbook records one compliant aggregate EPR row and two environmental monitoring sites, but no health camps or beneficiary counts.

REGULATORY COMPLIANCE

100%

compliance score contribution

Compliant rows	1
Registered rows	1
Inspections planned	1
Inspections conducted	1

ENVIRONMENTAL & HEALTH SAFEGUARDS

2	0	0
Distinct sites monitored Moradabad + Ghaziabad	**Health camps** No camps recorded	**Beneficiaries screened** No beneficiary count recorded

Moradabad	Heavy metals in soil + water	Exceeds permissible limits near informal sites; remediation ordered by NGT
Ghaziabad	Water + ambient air	High particulate and chemical effluent traces; monitoring active

Source: 4_Compliance_Tracker + 6_Env_Health_Monitoring

ker shows hotspots and awareness activity — but participation data is largely

This is where the workbook most clearly separates “program exists” from “impact is measurable.”

4	1	0	0
Informal hotspots	**Awareness programs**	**Participants reached**	**Collection drives**
All four remain non-formalized in totals	State-wide UPPCB drive recorded	Field left blank	School + RWA drives recorded as 0

INFORMAL-SECTOR HOTSPOTS

Moradabad E-Waste Circuit Cluster	Moradabad · Under NGT Action Plan
Loni & Seelampur Border Scrap Cluster	Ghaziabad · Under Enforcement Drive
Dasna & Masuri Informal Dismantling Hub	Ghaziabad · Partially Remediated
Kanpur Unorganized E-Scrap Market	Kanpur Nagar · Identified

AWARENESS PROGRAM

UPPCB State-Wide E-Waste Awareness & EPR Sensitization Drive

Target audience	Producers · Recyclers · Public
Participation field	**Not populated**

What needs to improve in the tracker — and why it matters

Priorities below are a presentation synthesis from the workbook's missing fields and scorecard logic, not a quoted state roadmap.

#	GAP	WHY IT MATTERS	IMMEDIATE DATA / PROGRAM PRIORITY
01	**Complete generation inventory**	District-level category quantities are largely blank despite a state total figure being present.	**Populate category-wise generation by district and document update dates.**
02	**Reconcile collection data**	State collected total is populated while district-level collection fields are blank; this weakens the score logic.	**Enter district collection, centers and EPR target/achievement fields.**
03	**Measure informal-sector transition**	Four hotspots are listed but worker and formalization counts are empty.	**Capture workers, training, registration and remediation outcomes.**
04	**Quantify awareness impact**	One program is recorded, yet participants and collection-drive counts are 0/blank.	**Record participants, campaign dates, drives and take-back outcomes.**
05	**Extend health safeguards**	Two monitoring sites are logged but no health camps are recorded.	**Track screenings, camp frequency and beneficiary counts alongside hotspot monitoring.**

THE TAKEAWAY

s a substantial formal-recycling base — but the tracker is not yet a complete perf

01

FORMAL CAPACITY

388,000 t/yr of listed installed capacity, with 376,896.74 t processed in the latest row.

02

COMPLIANCE SIGNAL

The current scorecard awards the full 15 points for the regulatory compliance category.

03

DATA GAP

20.5 / 100 is driven largely by blank or incomplete generation, collection, informal-sector and awareness field

Next move

Treat the workbook as a quarterly control tower: complete missing fields first, then use the same scorecard to measure year-on-year change.
