CIRCULAR ECONOMY & AI

ShareKart

AI-Powered Surplus & Resource Sharing Platform transforming unused items into localized value before they become waste.

NEXT-GEN RESOURCE REDISTRIBUTION

The Challenge & Our Solution

The Problem

Massive Resource Wastage: Tons of usable furniture, appliances, books, and business inventory are discarded daily simple because owners no longer need them.

Lack of Localized Discovery: Buyers, charities, and seekers cannot easily find affordable or free local pre-owned items before they end up in landfills, creating unnecessary expense and carbon impact.

The ShareKart Solution

AI-Driven Value Extraction: Instant snap-and-scan mobile identification evaluates condition, estimates value, and recommends optimal outcomes.

Smart Local Matching: Seamlessly redistributes surplus assets across local neighborhoods, offices, housing societies, and authorized recycling partners.

End-to-End User Journey

STEP 01

Scan & Upload

Snap a picture of any surplus or unused item using the mobile camera.

STEP 02

AI Evaluation

AI identifies item specs, evaluates quality condition, and estimates realistic market value.

STEP 03

Smart Action

Recommends whether to Sell, Donate, Exchange, Rent out, or Recycle.

STEP 04

Local Match

Connects with nearby verified users, colleges, businesses, or recyclers.

STEP 05

Fulfillment

Arranges rated doorstep pickup, delivery, or authorized disposal.

SHAREKART CORE PROCESS

Multi-Tier Monetization Model

Transaction Fees

Percentage commission earned on successful peer-to-peer sales and rental agreements.

Featured Listings

Paid placement options for sellers and businesses looking to boost listing visibility.

B2B Subscriptions

SaaS tier for offices, housing societies, and universities to manage surplus inventory.

Logistics & Delivery

Revenue share from optional doorstep pickup and localized courier services.

Partner Commissions

Lead-generation commission from partnered movers, refurbishers, and e-waste recyclers.

Premium Membership

Subscription perks including priority AI matching, free pickups, and enhanced buyer verification.

Impact & Core Benefits

- **Unlocks Hidden Economic Value:** Turns unwanted household clutter and corporate surplus into cash flow or tax-deductible donations.
- **Promotes Local Circularity:** Prioritizes reuse within local neighborhoods before routing items to recycling or disposal facilities.
- **Verifiable & Safe Ecosystem:** Built-in community ratings and background verification ensure trusted transactions for all users.
- **Environmental Sustainability:** Significantly reduces municipal landfill waste and prevents unnecessary new manufacturing emissions.
